## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-31 (FIGS. 1-6), drawn to a learning item sequencing system and method, classified in class 434, subclass 322.
  - II. Claims 32-50 (FIGS. 7-9), drawn to a perceptual learning system and method, classified in class 434, subclass 236.
  - III. Claims 51-62 (FIGS. 10-12), drawn to an automated time-based hinting system and method, classified in class 434, subclass 323.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as sequencing learning items based on response data. Invention II has a separate utility such as teaching students to recognize diagnostic structural elements. Invention III has a separate utility such as automated, time-base hinting. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
